At this new site we have a selection of 2BED and 3BED ultra luxury apartments (most with sea views) for sale at a significant discount of up £100,000 off list price GOVERNMENT LENDER The developer has secured funding from a government lender for 100% of the build cost of this site, meaning the sellers are only selling 50% of the units at huge. The sellers are keeping the other 50% of units and adding them to their portfolio. LOW DEPOSIT Due to the developer securing the government funding for 100% of the build cost of whole site prior to a single brick being laid, investors can invest with just a £10,000 deposit (paid on exchange of contracts) followed a final £10,000 instalment in October 2017 with NOTHING FURTHER to pay till completion in April - May 2018. ALL investors deposit funds are fully protected and secured.

SECURE AND SAFE INVESTMENT Planning is APPROVED, and the sellers own the land outright, so no risk there! You can imagine how difficult it was to secure lending for the build from a government loan. This took a long time and they carried out tireless due diligence i.e went through the plans, end values, discounted investor prices, purchase contracts and build contracts etc as well as checking previous developer builds and their credit worthiness. Rest assured the government were happy with everything and hence they're happy to lend the full cost of the build works.
